Update on Division: Uniform NC\textsuperscript{1}

Eric Allender* \hspace{1cm} David A. Mix Barrington†

September 13, 2000

The MS thesis of Andrew Chiu [1] contains an algorithm for integer division, that can be implemented in \text{Atime}(\log n) (i.e., in the most uniform version of NC\textsuperscript{1}). Our ECCC Submission will be revised soon, to reflect this.
